

The Department of Water, Atmosphere, Environment, Institute of Hydrobiology and Aquatic  
Ecosystem Management is currently seeking an experienced

## Postdoctoral Research Associate in running water ecology

(Reference code: 11)

Extent of employment: 40 Hours per Week  
Duration of employment: as soon as possible, limited for 6 years

Workplace: WasserCluster Lunz

Gross monthly salary and pay grade in terms of collective agreement  
for university staff (payable 14 times per year): B1 lit. b, €3.711,10

WasserCluster Lunz provides an innovative work environment of interdisciplinary and international  
scientists. New laboratory facilities and basic research infrastructure are available and include state-of-  
the-art confocal microscopy, IRMS, gas-chromatography, HPLC, CFA, flow cytometry, molecular  
biology, etc.

### Responsibilities

- The position requires a PhD, a distinguished record of research and experience in leading an  
active research programme
- The successful candidate must have demonstrated the ability to secure external funding, and  
show strong commitment to the mentoring of students and fellows
- The scientific working language at WasserCluster Lunz is English and German

### Skills and qualifications

- Doctorate in aquatic ecology or related field
- A strong background in running water ecology and a complementary topic to the existing  
working groups at WasserCluster Lunz and partner universities
- Additional experience in applied research projects is of advantage
- Successful application and execution of research projects
- Co-supervision of bachelor, master and PhD students
- Experience in conducting university courses in limnology and related fields in English and if  
possible also in German
- The candidate is expected to have a complementary expertise to the established fields of  
WasserCluster Lunz and the working groups at the Institute of Hydrobiology and Aquatic  
Ecosystem Management at the University of Natural Resources and Life Sciences, Vienna.  
Potential topics could be, but not limited to:
  - experimental running water ecology,
  - microbial ecology,
  - aquatic – terrestrial linkages and catchment – aquatic ecosystem linkages,
  - role of macroorganisms in biogeochemical cycles.
- Experience in presentations at international conferences and workshops, a number of  
publications in the respective field
- Skills in communication and team work in an international team and interdisciplinary teams

Applications can be submitted until: 12<sup>th</sup> of February 2018
